CUSTOMIZE SWITCH WITH NETWORK CABLES MODULES USING CISCO PACKET TRACER

AIM:

To customise a cisco switch by adding or removing network modules using cisco packet tracer & verify the changes in switch interfaces.

PROCEDURE:

1. Open cisco packet tracer.
2. Add a modular switch
3. Open the physical view
4. Turn off switch
5. Remove an existing module (optional)
6. Add a network module
7. Power on the switch.
   - verify the new module detected
8. Verify the interfaces
9. Connect the End devices using 2 copper-straight through wires cables
   PC0 → switch port
   PC1 → switch port
10. Configure IP address for PC0 & PC1 in desktop section.
11. Test connectivity & execute in command prompt
    ping 192.168.10.3
12. Save the file.

RESULT:

Thus, the customisation of switch with network cables modules using cisco packet tracer was implemented successfully.
