Exp. no: 05 | DEVELOP A CUSTOMISED PING COMMAND TO TEST SERVER CONNECTIVITY

AIM: To develop a customised Ping command in python that checks the connectivity between a client & server by sending ICMP Echo Request packets & displaying the response time & status.

WORKING PROCEDURE:

1. Install Python & VS code
2. Create a python file named ping.py
3. Import the required modules
4. Accept the hostname or IP address from the user
5. Detect the operating system
6. Using ping -n 4 on Windows or ping -c 4 on Linux/mac
7. Execute the command using subprocess module.
8. Display ping output, including reply time & packet statistics
9. Check return code to determine if server is reachable.
10. Display Reachable or Unreachable based on result.

STEPS INVOLVED:

Step 1: Install python

Step 2: Install VS code

Step 3: Create project folder

Step 4: Write the program

Step 5: Execute program

Step 6: Enter website

RESULT: Thus the program to implement the development a customised ping command to test server connectivity was implemented & completed successfully.
