XMLRPC - CALCULATOR

AIM:

To develop a simple XMLRPC calculator to perform arithmetic operations

PROCEDURE:

1. Verify python installation
2. Create Project folder : XMLRPC - calculator w/ 2 folders inside server.py & client.py.
3. Write server.py & client.py programs save them inside the created folders.
4. Open 2 different cmd prompt & run each folder seperately.
5. Start XMLRPC server, then server.py & client.py in each cmd prompt.
6. Server.py >> XMLRPC calculator server running on port 8000...
7. Client.py >> Enter values & derieve output.

RESULT:

Hence, the XMLRPC calculator has been successfully implemented & verified.
