Waiting for client...
Connected by: ('127.0.0.1', 65500)
Client: helloo!!!
Enter reply: Hiii!!!
```

```
C:\Users\HDC0222007>cd "C:\Users\HDC0222007\Downloads\Experiment 8"

C:\Users\HDC0222007\Downloads\Experiment 8>python client.py
Connected to server
Enter message: helloo!!!
Server: Hiii!!!
Enter message:
```

Exp: 08 REVERSE SHELL WITH TCP

AIM:

To develop a program to create a reverse shell using TCP socket.

PROCEDURE:

1. Install & verify python downloads
2. Create a folder Reverse shell with two files server.py & client.py
3. Open VS code, write the program & save as server.py in in the reverse shell folder.
4. And another program & save as client.py in the Reverse shell folder.
5. Now the folder has 2 files server, client as mentioned before.
6. Open two different command prompts & run each file separately.
7. Now transfer messages from both command prompts & verify output.

RESULT:

Thus, the Reverse shell with TCP socket has been successfully implemented & verified.
